

VEHICLE TOWING SOLUTIONS FOR THE MINING INDUSTRY

INTRODUCING THE MINE SPEC TOWBAR

Hayman Reese Mine Spec is specifically designed to provide best practice functionality and safety for mining applications. When using a standard towbar, using a pintle adapter will, in many cases, downgrade the load rating of the towbar based on the manufacturers specifications. Standard towbars may not be designed, tested or approved for any other configuration other than a standard trailer ball mount. Standard towbars are generally purpose built for driving in normal conditions only.

1 Integrated 5 Tonne recovery rated points for rear recovery

2 Modular pintle hook maintains vehicle's tow rating

3 Low maintenance design, including high-security Nyloc fasteners

Mine Spec towbars are designed and engineered to give you the best and safest solution for maintaining the manufacturers full tow rating.

Whilst standard towbars are not built for use in recovery, the integrated recovery points engineered into the Mine Spec range allow for safe use of the towbar in recovery applications.

All Mine Spec towbars are fully compliant to Australian Standards and ADR certified for highest performance.

BEST PRACTICE & SAFETY

Hayman Reese Mine Spec towing solutions are specifically designed for mining fleet vehicles. Purpose-built, the towbars are designed with integrated recovery points. Where specialised towing solutions are required, Hayman Reese can engineer and tailor the right fit, never compromising on quality or safety.

VERSATILE OPTIONS TO SUIT MINING FLEET VEHICLES

Each Mine Spec towbar comes with:

- Full vehicle tow rating maintained for pintle towing
- Integrated recovery points to ensure safe use in recovery situations
- Industry standard bolt pattern to suit your choice of pintle solution
- OEM equivalent wiring solutions that support the vehicle's functionality and safety
- High security Nyloc fasteners
- Low maintenance design
- Lifetime warranty

PINTLE HOOK STYLES

Mine Spec towbars are designed to be customised to your sites needs with a range of different pintle attachments. With a standard bolt pattern, Hayman Reese has multiple options, from full forged to standard towballs, providing the ultimate versatility whilst maintaining the maximum tow rating.

For more pintle styles and part numbers, see the specification sheet.

HITCH BOX RETRO FITTING KITS

With a Hitch Box Retro Fitting Kit, it is easy to convert the Hayman Reese Mine Spec pintle hook towbar to a standard towbar, providing a simple solution when the vehicle reaches the end of its mining life.

Not only does this save time and money but the Hitch Box Retro Fitting Kits equip the vehicle with a safe, legal on-road towbar that is still equipped to handle recovery situations.

For more vehicle specific information on the Hitch Box Retro Fitting Kits, see the product flyer.

WHY HAYMAN REESE

DEDICATED BUSINESS PARTNERS

Our dedicated business partners are here to ensure we provide the correct tailored solutions for your team. Understanding your needs and working with our product and engineering team in Melbourne, our business partners will ensure you have only the safest highest quality towing products.

OVER 75 YEARS EXPERIENCE

Since the first towbar was manufactured for sale by Eric Hayman in 1941, Hayman Reese has been the leader in providing after-market towing solutions in Australia. A true pioneer of the industry, the brand is synonymous with premium quality and engineering excellence. Our ongoing commitment to innovation ensures that our products have continually evolved to meet the changing needs of vehicle towing over the years.

EXCEEDS AUSTRALIAN STANDARDS

Hayman Reese towbars are designed and manufactured to exceed AS4177, the Australian standard for towbars. Hayman Reese towbars are tested in a dedicated National Association of Testing Authorities (NATA) accredited towing test laboratory in Australia.

SUPERIOR FINISH & PROTECTION

Every Hayman Reese towbar is specially protected against corrosion by MetalShield™; an advanced e-Coat and tough powder coat finish, that provides protection from the elements and corrosion resistance.

THE LARGEST RANGE IN AUSTRALIA

Backed by the expertise of many decades of towing experience; in addition to our industry leading towing, weight distribution, brake controller and towing accessories ranges, the new Mine Spec range is designed, tested and certified to deliver the toughest and safest best practice solutions for the mining industry.

LIFETIME WARRANTY

At Hayman Reese, we stand by the quality of our products and proudly offer a lifetime warranty against manufacturing defects. For as long as you own the vehicle, you can rest assured that the quality of our workmanship is guaranteed.
